

At – Home Readers using iPhones / iPads

- First you'll need to locate Voice Memos on your device to make sure it's installed.
- Second – You'll need Dropbox to export your files. Download the Dropbox app, and a staff member will make you a folder with your name. You can either access that folder from your own dropbox account or log in using Radio Eye's account.

New Recording 3

2/10/20

00:00:08

To start recording: Press the red circle. Your time will start to tick up and you'll be able to see your recording line.

Save

You can use the tabs to select a section that you would like to delete.

When you're done and ready to export, click the three horizontal dots in the upper left

Select "Share"

In Dropbox, find the folder with your name and upload your recording to that folder.

Then select "Save to Dropbox"

Don't forget to email info@radioeye.org to let us know that you've uploaded your file!
